U.S. Patent and Trademark Office PTOL-303 (Rev. 08-06) Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that the prior art reference of Nippon does not teach the powder having a base material, metal film and metal oxide film being applied in that order. The claims are directed towards a composition, therefore, the manner in which the layers are deposited on the base material carries no patentable distinction, if the final product is the same.
